

Measured Sustainability

DRIVE YOUR BUSINESS FORWARD WITH

GCX DASH-

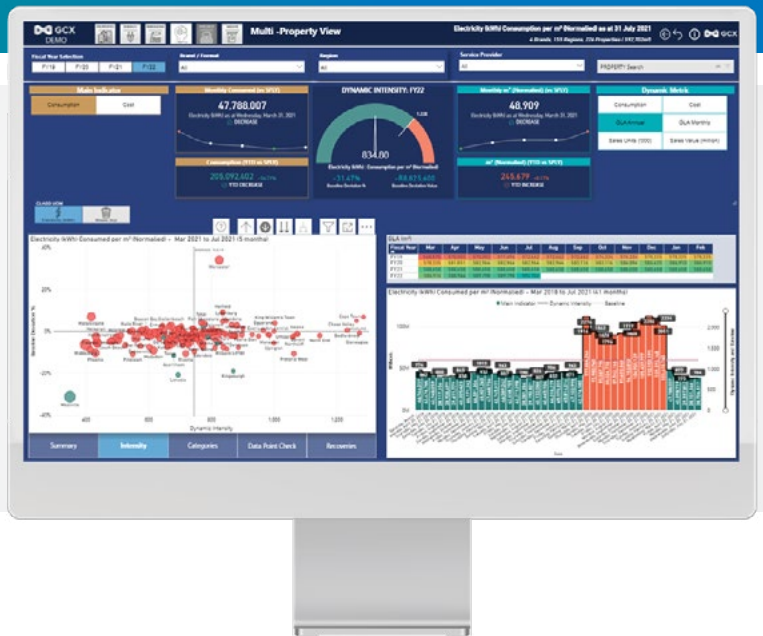

Drive your sustainability and business performance with interactive and meaningful data analytics from GCX DASH-.

GET THE EDGE

WITH GCX DASH-

The GCX Data Analytics and Sustainability Hub (DASH-) is where your data and our expertise combine to provide the ultimate reporting and performance benchmarking platform.

- **Save Time and Money**
- **Manage ESG Risk**
- **Drive Environmental Efficiencies**
- **Ensure Best Practice Corporate Governance**
- **Maximise Data Confidence**

As companies are under increasing pressure from investors and legislators to set more ambitious targets and improve their Environmental, Social and Governance (ESG) performance, the need for more accurate and reliable data has become vital.

GCX DASH- does not just deliver data confidence, but also business intelligence that can be used to make sound commercial decisions and align business practices with key sustainability indicators. GCX DASH- puts you in control by using your company data to actively measure and manage the material activity indicators to your organisation.

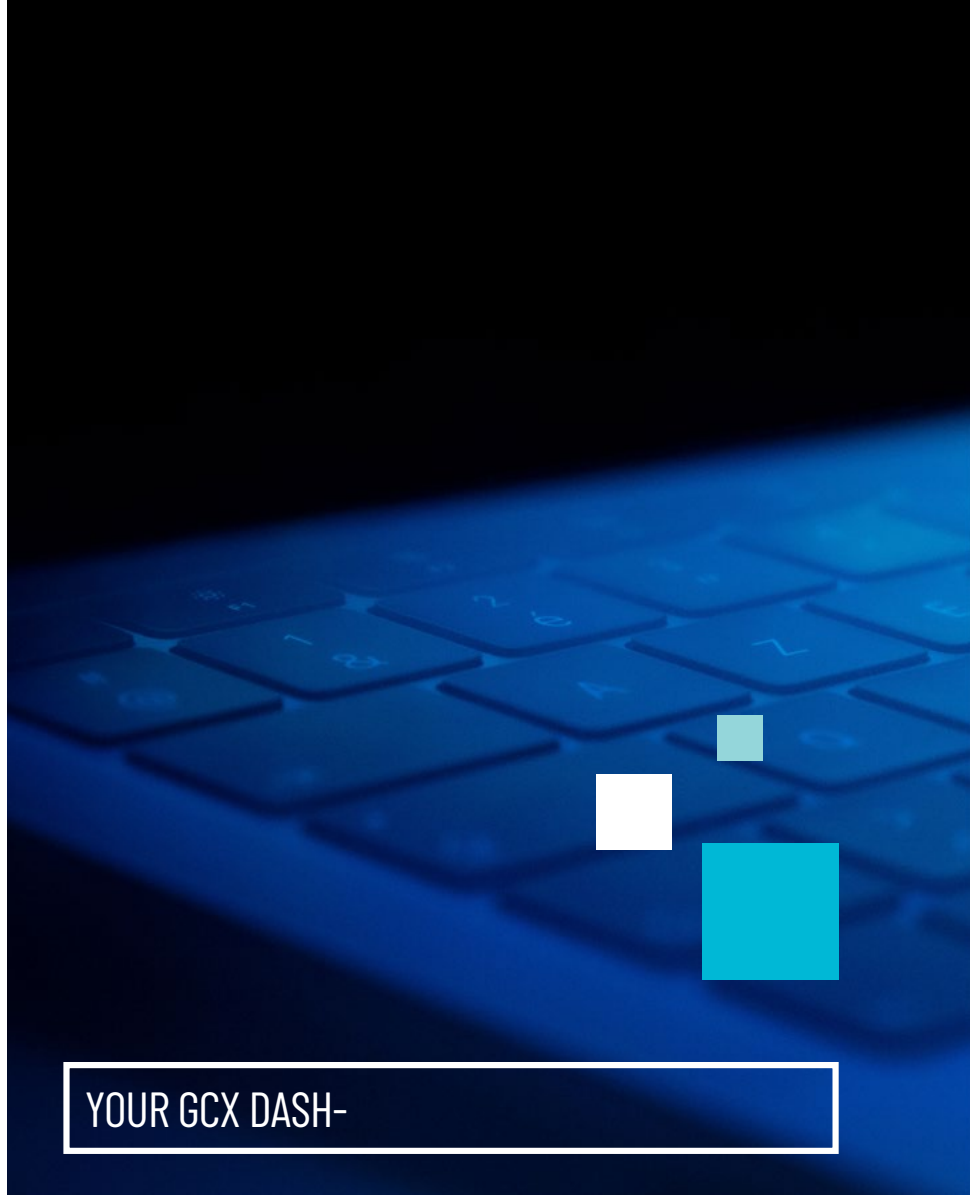

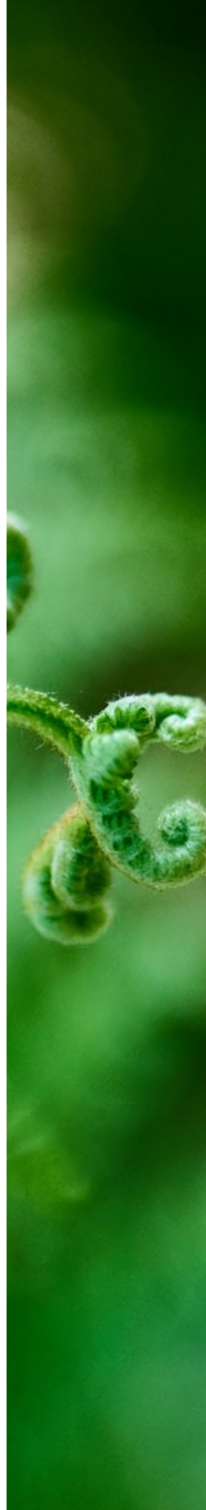

GCX DASH- consolidates reporting, at a group and asset level, and sets dynamic benchmarks to achieve improved performance.

The team at GCX are passionate and innovative in their service offerings and have successfully assisted Sun International in our sustainability journey.

- *Raveshni Maharaj*, Group Environmental Specialist, Sun International

YOUR GCX DASH-

TEAM

To become a business leader in sustainability, you need the right team to make sure that your data delivers business intelligence that helps you to hit your goals and targets.

GCX is a team of passionate business, sustainability and technology experts committed to helping companies measure and drive their sustainability performance.

The journey with GCX has been nothing but exciting as our organisation has seen their brand/company evolve since we started working with them. From the manual way of sourcing reports to just accessing them real time, information is just a click away!

- Tshepi Molefe, Group Environmental Sustainability Specialist, Discovery

INTELLIGENCE

AT YOUR FINGERTIPS

GCX DASH- is a game-changer in sustainable business performance, incorporating the financial and non-financial performance of your company's most granular activities.

Data is a fundamental part of driving sustainability in business and, ultimately, informs Environmental, Social and Governance (ESG) strategies and processes. As companies are under increasing pressure from

investors and legislators to set more ambitious targets, the need for accurate and reliable data analytics on sustainable resource management has become vital.

DASH- doesn't just deliver data confidence, but business intelligence that empowers companies to make sound commercial decisions and to allocate their resources accordingly.

Multi-sector Capability

DASH- can be implemented across all sectors, including Agriculture, Mining, Retail, Real Estate, Distribution, Manufacturing, Hospitality, Healthcare, and more.

One Version of the Truth

Get all your sustainability data and insights consolidated in one place. DASH- is web-based, interactive, and easy-to-use.

Enhanced Employee Productivity

DASH- enables your employees to focus their time and attention on more strategic initiatives rather than data collection and reporting.

Sustainable Performance Measured in Money

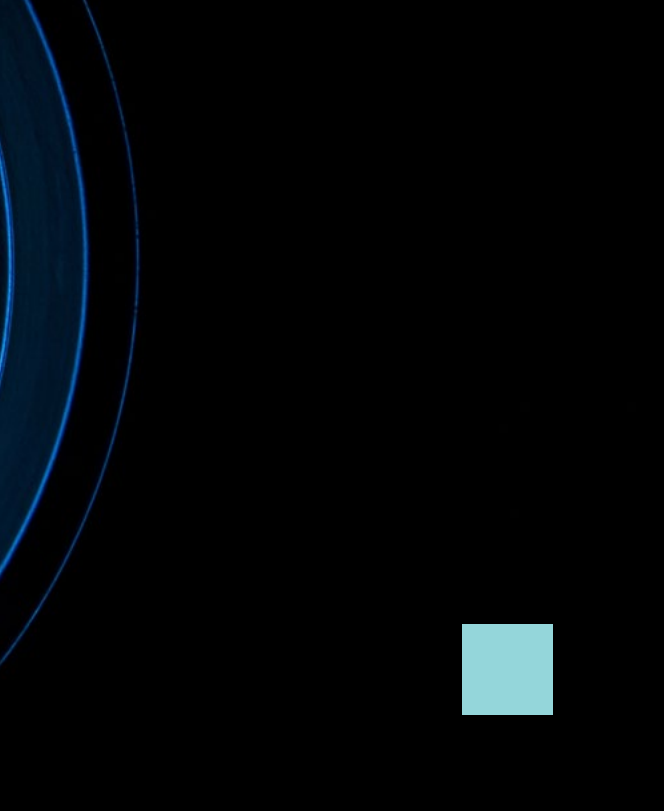

Reporting sustainable performance in a language that decision-makers understand. The strong financial focus of GCX DASH- helps businesses save money while improving sustainable performance.

Working with GCX, we have been impressed by the organisation's professionalism and understanding of the subject matter consulted upon.

- Madoda Khumalo, Strategic Services Executive, Sea Harvest

Independent and Objective

GCX is independent of all data providers, ensuring that we are unbiased while we work with you to identify anomalies and unlock value.

Competitive Benchmarking

Gauge your performance against your competitors in the relevant market. The internal and external benchmarking capability of DASH- gives you the edge in boosting your business performance.

100% Confidence in Your Data

Data anomaly finder and query management systems ensure that your data is accounted for at all times. The GCX team continuously interrogates your data to ensure it is accurate and reliable, giving you complete data confidence.

Next-level Corporate Environmental Governance

GCX takes the hassle out of governance by providing reliable data around your sustainable impact and delivering it in the various formats required for NGER, Carbon Tax, GRESB, CDP, and any other sector-specific reporting formats.

Full Carbon Accounting, Reporting & Disclosure

GCX DASH- is geared to give you all the information you need, in the relevant reporting formats, and in line with carbon emission standards and protocols

Cloud-hosted Data Platform & Dashboard - Completely IT independent

Hosted in the Microsoft Azure cloud, DASH- is accessible through any web browser, fully secure, and is reporting configured and automated.

The sophistication and intelligence of DASH- provides an unmatched level of visibility and transparency into your extended waste value chains to manage costs, increase recycling levels and build stronger vendor relationships.

- **Andre Nel**, Sustainability Manager, Pick n Pay

YOUR BUSINESS

DATA

AT WORK

The GCX difference is that our processes are coupled with our deep sustainability expertise that aims to provide consistent and comparable information to your stakeholders.

GCX puts you in control with real-time, on demand business intelligence

“

In the future, it will be essential for any multi-tenanted operation to have this type platform in order to confidently engage with tenants in a meaningful way.

- *lekraam Kariem*, Utility Analyst, V&A Waterfront

”

PHASE 1

1

Data Mapping

The initial data process map is developed while the boundaries and scope of the solution is determined.

2

Engage

GCX engages with all internal and external data providers and confirms all the data sources and parameters. Data is received.

3

Data Preparation

The client's data is sanitised and proprietary data sets are added. Relationships are then built between data sets and service providers; and inconsistent data is normalised.

4

Dashboard First Iteration

The first iteration of the dashboard is published.

PHASE 2

5

Quality Control

Dashboard anomaly and reconciliation tools are used to verify source documentation with dashboard data.

GCX DASH- Configuration & Development

1 Week To 1 Month *Dependent on Timing of Receipt of Source Data

GCX DASH- Customisation & Optimisation

Month 2 to 6

6

Customised Requirements

GCX engages with stakeholders to gather business objectives and KPIs. Standard performance reporting for relevant stakeholders and assets are then defined and configured.

7

Standard Operating Procedure

Procedures are developed that will include the final data process, roles and responsibilities, timing and reporting formats.

GCX provide a holistic service. To have a friendly, professional and experienced consultancy team available to our business enables us to make informed decisions on a variety of carbon and data elements!

- Natalie van der Bijl, Integrated Reporting & Sustainability Officer, Growthpoint
